Gender equality and women's empowerment are high on the international political agenda, but progress has often faltered on the evidence needed to deliver viable solutions. To address that gap, this event features the launch of a new paper, presenting 9 critical lessons from 47 independent evaluations as the basis for food systems solutions, actions and transformation.

Join the independent evaluation offices of FAO, IFAD, WFP and the CGIAR in a multi-stakeholder event that goes beyond the narrative to showcase the evidence and lessons needed to achieve gender equality and women's empowerment and transform our food systems.
